

# **ASL-8V Economy UV Drinking Water Sterilizer**

The SL-8V system is our most economical unit. As water passes through the U.V., minerals, iron, debris and other matter in the water may deposit onto the quartz sleeve. A minimum of once yearly is standard recommendation for quartz sleeve cleaning and U.V. lamp replacement.

## **ASL-8V Specifications**

- Maximum Flow: 8 gallons per minute
- Single Lamp
- KW@120 V: 0.03
- AMP@120 V: .25
- Pipe Size: 3/4" MIP
- Wetted Material: 304 Stainless Steel Tubing
